

A5 | A15

USB Update Instructions

Required Materials:

- Blank USB stick FAT32 formatted, maximum 8Gb

Instructions:

- Unzip and copy the unzipped file (named A5_A15.bin) to the USB stick.
- Plug the USB stick into the back of the amplifier and turn it on.
- Open the settings menu on the amplifier using the **Settings Menu** button on the remote control.

	<p>Menu Navigation</p> <p>Centre button to select/OK</p>
	<p>Settings Menu</p>

- Select “SYSTEM SETTINGS MENU” by pressing the centre button of the navigation pad. Then navigate down the menu list to “USB SOFTWARE UPDATE”.
- Press the centre button of navigation pad to select the update and again to confirm and start the update.
- Wait until the amplifier restarts and then remove the USB stick.
- To finish, perform a factory reset. Open the **Settings Menu** using the button on the remote control.
- Open the “SYSTEM SETTINGS MENU”, navigate to “RESET TO FACTORY DEFAULTS” in the System Settings Menu. Select and confirm. The unit will restart and all settings will be at defaults.

Update is complete.
